-----

### Professional Summary

I am a Software Developer with experience in web development, programming, and database management.

I have strong problem-solving skills and enjoy working in team environments.

I am always eager to learn new technologies and improve my skills.

My goal is to build efficient and user-friendly software that solves real-world problems.

-----

### Work Experience

#### Bartender

Life and Brand, Johannesburg, Alberton (Aug 2024 - Dec 2024)

- Solved customer problems quickly, similar to debugging software issues.
- Paid close attention to details, which helps when writing clean and accurate code.
- Managed multiple tasks in a fast-paced environment, just like handling software projects.
- Worked well with a team, improving my teamwork and communication skills.

#### Hospitality Assistant

A and B Events Solutions, Johannesburg (Apr 2023 - Present)

- Solved customer issues quickly, improving my problem-solving skills-important in software development.
- Paid attention to detail when taking orders, which is useful for writing accurate code.
- Managed multiple tasks at once, similar to handling different parts of a software project.
- Worked closely with a team, improving my communication and teamwork skills.

- Adapted to changing situations, just like learning new programming languages and technologies.

## Test-Drive Instructor (BMW)

YESPIRED, Johannesburg (Aug 2022 - Present)

- Explained technical features of cars to customers, just like explaining software functions.
- Solved customer concerns by analyzing their needs, similar to fixing software problems.
- Focused on user experience, which is important in software design.
- Adapted to different car models, showing my ability to learn new technologies quickly.
- Paid attention to details, a skill that helps in writing precise and error-free code.

## Brand Ambassador

BITE Marketing, Western Cape (Jun 2020 - Present)

- Spoke with different people and explained products, improving my communication skills-helpful in software development.
- Used customer feedback to improve marketing, similar to how developers improve software based on user feedback.
- Adjusted marketing plans for different customers, showing problem-solving skills-useful when learning new technologies.
- Worked in teams, learning how to collaborate in fast-paced environments.
- Used technology to promote products, proving my ability to learn and use new digital tools.

-----

## Projects

### Become Healthy Living (PTY)

#### Health and Fitness Website

- Created a website to help people learn about health and fitness.
- Made sure the website works well on different devices.
- Used modern web technologies to make the website fast and user-friendly.

### Nutrinize

#### Nutrition Tracking App

- Designed and developed an app that helps users track their daily nutrition and calorie intake.
- Integrated database management to store and analyze user food logs.
- Used JavaScript, Node.js, and SQL to create a responsive and scalable system.

- Focused on user-friendly UI/UX design to make tracking meals simple and intuitive.

-----

## Education

### Systems Development Certificate

Academic Institute of Excellence (AIE), Midrand, South Africa (2019 - 2021)

- Gained strong programming skills in JavaScript and software development fundamentals.
- Learned about database management, digital literacy, and core software development.
- Completed a certification in Systems Development.

### Matric Senior Phase

Supreme Education College, Johannesburg, South Africa (2007 - 2015)

- Achieved Matric Certification with a focus on mathematics, science, and technology.

## Additional Certifications

### Bartender and Mixology Certification

Udemy, Johannesburg, South Africa (2024)

- Developed knowledge in mixology, customer service, and hospitality management.
- 

## Skills

### Technical Skills

- Programming Languages: JavaScript, Python, Node.js
- Database Management: SQL, MySQL
- Web Development: HTML, CSS, JavaScript
- Software Development: Object-Oriented Programming (OOP), Agile Methodologies
- Debugging & Troubleshooting: Identifying and fixing code issues efficiently

## Soft Skills

- Problem-Solving: Breaking down complex problems and finding effective solutions
  - Attention to Detail: Writing clean, efficient, and error-free code
  - Teamwork & Communication: Working effectively with teams and explaining technical concepts clearly
  - Adaptability & Quick Learning: Learning new programming languages and tools quickly
- 

## Hobbies

- Reading
  - Traveling
  - Coding
  - Personal Training
  - Cooking
-
